A Global Presence

All you need is Atkore

We are a leading manufacturer of electrical solutions that power and protect the world around us. For nearly a century, we have grown through a deep understanding of the high demands of the construction industry. Our portfolio of industry-leading brands, coupled with our breadth of products and solutions, brings exceptional value to our customers.

Our Mission

Atkore's mission is to be our customers' first choice by providing unmatched quality, delivery and value based on sustainable excellence in strategy, people and process.

Global manufacturing serving global markets

Our 5,000 employees and 47 manufacturing facilities worldwide are contributing to a future where engineers, contractors and our distributor partners can research, select, specify, procure and install the right solutions on time and under budget.

Environmental, Social Governance

Our commitment to producing high quality products while ensuring that all materials used in the manufacturing of our products are free of conflict minerals, lessens the negative impact to the people that create, use and deliver our products, while protecting the environment in which we work. We are invested in making environment, health, and safety an indispensable part of our company's commitment to sustainability.

Product Overview

Cable Management & Protection

Our market leading brands of Unistrut, Marco, Vergokan and Flexicon provide a comprehensive range of products and solutions including metal framing, cable management and flexible conduit.

Atkore™ Unistrut

Atkore Unistrut is renowned for metal framing and cable management solutions worldwide. With an extensive array of products we can help to deliver systems and solutions to manage and route your cables safely and securely.

- ▲ Channel / Strut
- ▲ Channel fixings
- ▲ Cable Tray & Accessories
- ▲ Cable Ladder & Accessories
- ▲ Pipe Clips and Clamps
- ▲ Mounting Systems
- ▲ Surface Trunking
- ▲ Lighting Trunking
- ▲ Underfloor Systems

Atkore™ Marco

Marco offers a wide range of cable management products to safely and efficiently route cables. As a leading UK Manufacturer of uPVC cable management systems and Steel Wire Cable Tray we have many innovative solutions to save you time and money on your next project.

- ▲ Perimeter Trunking
- ▲ Data Trunking
- ▲ Mini / Maxi Trunking
- ▲ Accessories
- ▲ Bench Trunking
- ▲ Power Poles
- ▲ Power Posts
- ▲ Steel Wire Cable Tray
- ▲ Wire Basket Accessories

Product Overview

Cable Management & Protection

Atkore™ Vergokan

With 3 manufacturing facilities across Europe, and Worldwide distribution, Atkore Vergokan specialises in metal cable support systems to save installers time.

- ▲ Wire Basket
- ▲ Cable Tray
- ▲ Cable Ladder
- ▲ Mounting Systems
- ▲ Industrial Floor Trunking
- ▲ Floor Installations

Atkore™ Flexicon

Atkore Flexicon are a market leading UK manufacturer of Cable Protection Solutions, offering over 62 different metallic & non-metallic flexible conduit systems for technically demanding applications.

Services & Solutions

The highest level of customer support

At Atkore, we are fully committed to providing the highest levels of customer support at all stages to ensure we specify and supply the right product solution for your project needs.

Consultation, Design & Specification

Our professional sales and technical teams will spend time reviewing the client's needs throughout the early stages of the project to ensure the products and solutions we design and specify fulfill the specific requirements of the project.

Metal Framing & Cable Management

Engineered Solutions

From single support frames to complex modular schemes Unistrut engineered solutions team will develop the optimum design to minimise complexity, reduce installation time, increase quality and performance and in most cases reduce costs. This is achieved through our DfMA (design for manufacture and assembly) process which includes detailed FEA (finite element analysis).

Unistrut Bespoke Pre-Fabricated Framing Systems

We can manufacture pre-fabricated framing solutions which help reduce on-site time and labour, and speeds up the construction process. From grid systems supporting cable management and HVAC to modular frames for solar panels, the possibilities are endless.

Flexicon Tailored Solutions

Working closely with our customers, we understand your protection challenges and will work with you to provide customised solutions, including non-standard lengths, pre-terminated assemblies, bespoke thread types and sizes and different materials

Technical Submittal

We will provide technical submittals to include drawings, material specifications, product data, load data, test certificates and samples where appropriate.

Services & Solutions

The highest level of customer support

Manufacture

Our ongoing investment programme in technology, increased capacity and people ensure our products are always manufactured to the highest quality.

Quotations

We provide detailed quotations for your project requirements.

Installation

Our dedicated teams have the knowledge and experience to deliver quality installs of our metal framing and cable management solutions on time and within budget.

Technical Support

Our technical support team are on hand to help with all of your questions before, during, and after the supply.

Delivery

At Atkore, we pride ourselves in supplying our products when you need them through our network of distributor partners.

Our product solutions have been specified and installed on projects across the world. Here is a small selection of project references illustrating some of the key vertical markets that we operate in.

Atkore Vergokan
Name: Agrotopia
Vertical Market: Scientific research
Products Used: Cable Trays

Atkore Unistrut & Flexicon (APAC)
Name: Kiwi Rail
Vertical Market: Rail
Products Used: Cable Ladder

Atkore Vergokan
Name: Gipsberg
Vertical Market: Power & Energy
Products Used: Wire Cable Trays

Atkore Unistrut
Name: Ahead of the curve
Vertical Market: Retail
Products Used: P1000T and fixing accessories

Atkore Marco
Name: Craigavon Area Hospital
Vertical Market: Health Care
Products Used: Marco Elite 3 Hygieia

Atkore Flexicon
Name: TFL
Vertical Market: Rail
Products Used: Connectabox

Atkore Vergokan
Name: Cadcamatic
Vertical Market: Industrial
Products Used: Cable Trays & Floor Installations

Atkore Flexicon
Name: Metlok
Vertical Market: Rail
Products Used: LTPBRD Conduit System

Atkore Flexicon
Name: Thameslink
Vertical Market: Rail
Products Used: LFHUBRD Conduit System

Atkore Flexicon
Name: Liverpool Solar
Vertical Market: Renewables
Products Used: FPAS Conduit with FPA T-Pieces

Atkore Marco
Name: Intercity Place Health Care Campus
Vertical Market: Health Care
Products Used: Steel Wire Cable Tray

Design Tools & Resources

Providing the tools and resources you need to be successful

At Atkore, we provide an ever increasing suite of design tools and resources to help specifiers and contractors select and specify the right Atkore product solution with confidence.

BIM Library (Building Information Modelling)

Our BIM Library is an intelligence-based 3D Model software system used for planning, designing, construction, and management of infrastructures, buildings and sites. Populated with information such as manufacturer, part numbers, UPC codes, size, type and colour. Our BIM files provide clash detection and reduction in cost as additional benefits.

REVIT® Toolbar

Our custom integrated toolbar to the Revit® software package is free to download. This new Atkore Revit® Toolbar allows contractors and BIM designers to access all Atkore products without leaving the Revit software. Automatically running in the background and available for use in any project, there's no need to download individual files.

Flexicon 3D CAD models

Powered by Cadenas, our parts community provides technical information on all of our conduits, fittings and accessories. From CAD models, dimensional diagrams and 3D PDFs to part numbers, sizes and downloadable data sheets – all available in one place.

Unistrut Engineering Calculators

We provide these useful tools as a valuable resource for engineers and designers doing any type of structured analysis. The Atkore Unistrut calculation tool allows for design calculations aiding bracket design to support technical submissions. The tool analyses the performance of beams or cantilever brackets when a load is applied. The calculation tool can calculate point, distributed, moment and omni directional loads to either euro code or other design characteristics. A long form report, heat map and graphical report can be produced and exported providing instant results.

Unistrut Content Centre for use with Autodesk Inventor

The custom-built Content Centre for Atkore Unistrut to use with Autodesk Inventor will help designers to select the best products for their specific applications. Using the custom library will ensure the user can specify genuine Atkore Unistrut part numbers for their BOM's and is guaranteed to save them time when designing. The integration into Autodesk Inventor also reduces the need for extra training.

Cross Reference

Our Atkore Unistrut cross reference tool finds the functionally equivalent Atkore part based on another manufacturer's part number. Search by complete competitor part number to find an exact match or by partial numbers by using an asterisk (*).

Design Tools & Resources

Providing the tools and resources you need to be successful

Technical Data Sheets

To give you confidence and help you select the correct products for your application we can provide technical data sheets for all of our products, documenting performance properties and key specification information.

Certificates

We will provide copies of certificates to support technical submittals on request.

Flexi App – find a conduit

Flexiapp offers a simple selection tool, based on your requirements, to help filter and identify the most suitable conduit solution from our 62 conduits systems ready for your project.

Case Studies

We have a library of case studies across our company websites which provide project references across all of the key vertical markets that we operate in.

Video Library

You will find useful video tutorials and product launch videos on our websites and across our You Tube channels.

Latest Literature

You will find all the latest Atkore literature on our websites.

Training Academies

We have dedicated training facilities in the UK, Belgium, Australia and New Zealand to provide hands-on training for our products and design tools to consultant engineers, contractors and our distributor partners.

FAQ's (Frequently Asked Questions)

Many of our websites include a section of FAQ's, which are available 24/7.

Sustainability Advancement

Committed to driving positive ESG Impacts

“Sustainability is central to the strength, safety, and longevity of our business.”

– Bill Waltz, President and CEO

Committed to Driving Positive ESG Impacts

2025 Sustainability Targets:

10% Reduction

In scope 1 & 2 GHG (Greenhouse Gas) emissions intensity*

80% of sites

Meeting TBSO (Team-Based Safety Observations)

30% Diversity

Across Senior Leadership Team

80% Participation

In scope 1 & 2 GHG (Greenhouse Gas) emissions intensity

Sustainability Efforts Recently Recognized by Leading Independent Organizations

Earned **Newsweek** for America's Most Responsible Companies for 2nd year in a row

Great Place to Work® certified for 3rd year in a row

Named one of **Forbes 2023** America's Best Midsize Companies

Earned **2023** Top Workplaces USA Award

*Revenue used to calculate future GHG emissions intensity will be adjusted to remove the impact of changes in average selling prices.

Sustainability Advancement

Committed to driving positive ESG Impacts

Safety and Environment Management System (SEMS)

In 2022, Atkore enhanced and expanded our tracking mechanisms to report the quantities of various materials recycled. These materials include scrap metals such as stainless steel, brass, aluminum, zinc, and copper in addition to carbon steel; plastics such as PVC and high-density polyethylene (HDPE); and electronics, paper, and cardboard. This effort has been used to establish a percent diversion to landfills that can be measured and improved upon in future years.

Energy

Initiatives that are being implemented as part of the ENERGY STAR® Challenge include the application of energy management software solutions, electrochemical motor lubrication systems, DC motor conversions and monitoring, and an increased focus on upgrading compressed air systems, chillers, and cooling towers to drive efficiency.

Multiple sites are utilizing or introducing an energy management system for machinery, which allows us to monitor the energy usage and efficiency of our equipment. This enables us to make sustainability-informed decisions around production times, machine running hours, and even machine replacements. In addition to our work with ENERGY STAR®, we also implement green building practices where possible. The distribution warehouse connected to our largest manufacturing facility in Harvey, Illinois is certified LEED Gold and we have continued to roll out LED lighting across locations. At certain European sites, we have installed solar panels, electric vehicle charging stations, and employee bike-to-work initiatives that help to reduce our energy footprint.

Climate, Carbon and GHG Emissions

Climate change presents significant challenges for businesses, communities, and the planet. Atkore is committed to reducing GHG emissions across our operations, utilizing our product offerings to support the low carbon economy transition, and strategically addressing the implications of climate change for our business. Further, we are pursuing alignment with the recommendations of the TCFD to more effectively disclose Atkore's climate-related risks and opportunities. As part of this effort, in 2022, we conducted scenario analyses to identify climate-related physical and transition risks and opportunities with the support of a third-party consultancy.

Sustainable Products

We are committed to help our customers solve problems by providing safe, sustainable, and innovative products. Our product development team works to continuously improve our product offerings and taking into account how our changing world influences the needs of our customers.

Some of our most utilized materials, including PVC, steel, and copper, are fully recyclable. Segregating metal and plastic for reuse or offsite recycling reduces waste generation from production processes. PVC used in our plastic conduit facilities, is reground and reused on site. In our New Bedford, MA, facility, PVC from certain products is repurposed for production of other consumer goods. Nearly 100% of the PVC waste from production in our Cable Management business in the UK goes back into manufacturing. In addition to being highly recyclable, this strategic alignment of supply and production reduces "product-miles" and keeps the carbon footprint of the product to a minimum.

*Revenue used to calculate future GHG emissions intensity will be adjusted to remove the impact of changes in average selling prices.

Industry Standards

Compliant with international standards

Our products have been designed to be compliant with international standards supported by an extensive programme of third party and in-house testing.
