

Engineered Solutions

We are the experts when it comes to understanding product capabilities and can engineer solutions to help you save time and money when it comes to your protection requirements.

Working closely with our customers, we understand their protection challenges and have provided numerous customised solutions. Some examples of specials and tailored solutions are listed below:

Non Standard Lengths

- Long lengths – If 50m is not long enough we can provide extended lengths in special containers and cages up to 1,700m.
- Short lengths – 10m is our smallest standard coil length but we can offer shorter pre cut lengths.

Assemblies

- Ideal for use for wiring harnesses or for OEM's who are integrating products into their finished equipment. Consisting of pre-cut lengths of conduit, with fittings pre-terminated ready for assembly and wiring

Different Polymer Formulations

- We offer a range of different Polymer formulations to change the performance characteristics and properties of our Flexible Conduits. This could be different: – Colours – UV resistance – Flame retardancy – Fire performance properties – Anti-static performance.

Bespoke Fittings

- We can offer various thread sizes, types and terminations options to interface with our conduits. We have developed time and labour saving solutions to interface with equipment.

Whatever your application, we've got it covered
