

IMPROVING CARE TODAY

BY THINKING ABOUT TOMORROW

designed to be better.™

legrand®

INFRASTRUCTURE SYSTEMS
THAT LOOK FORWARD

Improving care today doesn't mean you have to forget about tomorrow. Legrand knows that the needs of your healthcare facility infrastructure will evolve. Our products are designed with your current and future needs in mind – from changes in electrical solutions for patient-friendly environments to evolving requirements for storing and accessing critical and secure patient and other information.

Legrand is committed to designing innovative products and systems that you can trust. Through our extensive range of smart, adaptable, easy-to-install products, you can maximize capabilities while realizing energy and operational efficiencies.

We support healthy, up-to-date and strong infrastructures. So patients and their families can be safer and more comfortable. Caregivers and staff can be more effective. And facility managers and operations can be better supported today and tomorrow.

DESIGNS THAT ENHANCE CONNECTIONS AND FIRST IMPRESSIONS

No-hassle patient check-in. A safe, open environment. Internet and infotainment access. All designed to blend in seamlessly. Legrand solutions help you care for the healthcare facility standards of today and tomorrow.

Powering Convenience

Plugmold® Multioutlet Systems tamper-resistant version adds safety to a great solution that delivers the convenience of multiple outlets and USB charging.

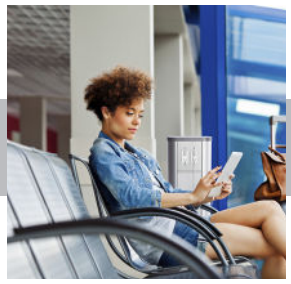

24/7 Security Solutions

ViewPoint™ monitoring consoles and VisionFrame™ monitor wall systems increase patient and staff safety inside and outside your building with high-resolution video surveillance technology.

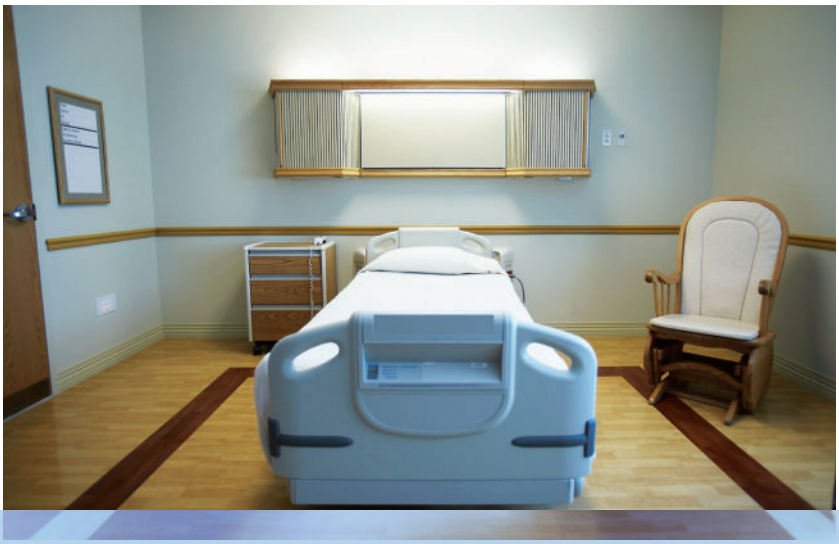

Open Floor Designs

Evolution™ Series Floor Boxes aesthetically bring power, communications and A/V wiring to open spaces.

Access to Full Charge

Provide easy access to power in wide-open spaces with Vista Architectural™ columns and satisfy the need to charge today's must-have mobile devices.

Create a patient-friendly environment. From lighting management to network solutions, our products allow patients to stay comfortable and connected. Our systems help reduce stress and increase safety for you and your patients. Now and in the future.

READING VITALS IS IMPORTANT

SO IS READING GET-WELL CARDS

Enlightened Controls

Provide greater comfort for patients while helping your facility with energy management requirements with Digital Lighting Management (DLM).

Network Connectivity

Legrand network solutions support patient room high-density work area requirements. Our color-coded products easily identify different services, giving the medical staff reliable access using IP-connected devices for patient care and providing families with connections for their tablets and laptop devices.

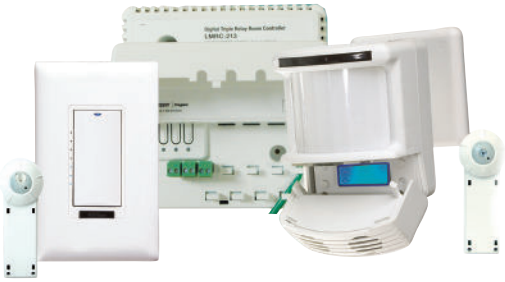

Unsurpassed Safety

PlugTail™ hospital grade receptacles offer a variety of solutions for keeping patients and staff safe. Legrand's hospital-grade nightlight/GFCI provides ground fault protection against water in bathrooms while serving as a beacon to avoid falls.

IMPROVE PATIENT CARE WITH 24/7 SUPPORT FOR NURSES

Make nurses a top priority – so they can focus on their top priority patients. That's why we have a range of solutions that help to support patient care – from minimizing eyestrain to providing real-time access to patient information.

Digital Lighting Management

DLM automatically ensures optimum lighting so nurses can easily see patient records and monitors. Remote lighting controls also allow nursing staff to manage lighting levels in patient rooms without disturbing occupants.

Connecting Without Walls

Evolution™ Series Poke-Thru Devices can feed power and communications to nurse's stations or wherever computers and patient monitors are critical.

Ready Point-of-Use Access

Legrand work surface solutions provide access to power, communications and A/V right at the point-of-use.

Cable Management

We provide the highest quality cable management solutions for any situation through the design of effective, efficient and innovative Cablofil® wire mesh cable trays so nurses never worry about tangling or tripping over wires.

ADAPTABLE SYSTEMS LEAD TO ADVANCEMENTS

AND IMPROVED DIAGNOSES

When today's technologies change, high-capacity power cabling and network systems must effortlessly adapt. We can prepare you by anticipating your future needs, while maintaining the highest standards for performance and reliability.

Powerful Pathways

Wallduct, aluminum Trenchduct and nonmetallic raceway allow for sufficient capacity to power high-tech MRI and CT machines. They are UL listed to maintain the highest standards of health and safety.

Hospital Grade Receptacles, Plugs and Connectors

Non-ferrous materials help minimize interference with proper operation of equipment for more uptime and accurate readings. Count on Legrand extra heavy-duty hospital grade devices to power and protect critical equipment.

MRI-Ready

Legrand's PW aluminum ladder tray system – the only one with both a non-ferrous tray and hardware – is the perfect MRI-ready solution.

SOLUTIONS THAT FOSTER LIFE-CHANGING DISCOVERIES AND INNOVATIVE BREAKTHROUGHS

In any lab environment, flexibility and safety are paramount. Manage today and the changes of tomorrow with Legrand power and protection solutions.

Configurable Power and Data

From the TableSource™ series of work surface products to hanging and floor-mounted Vista multi-service columns, we offer a wide range of integrated power, communications and A/V solutions.

Flexible Infrastructures

Facilitate moves, adds and changes in labs with prewired aluminum and steel raceways. Zone cabling distribution brings modular flexibility to the point-of-use.

Hospital Grade Plug and Play

Power and protect sensitive lab equipment. PlugTail receptacle, surge protective and GFCI devices that change out 3X faster than standard devices.

Instant Access Connections

Robust and reliable connections support streaming video and medical imaging – must-have applications for leading research labs in any field.

Technology at Point-of-Use

Lab Bench Pedestal Table Boxes provide increased capacity and access to multiple services – from power to communications – in a variety of configurations to meet the evolving and demanding needs of laboratory activity.

AS INFRASTRUCTURE DESIGN NEEDS SHIFT
WE HELP YOU PREPARE FOR WHAT'S NEXT

Data center technology evolves quickly. That's why our holistic approach ensures next generation compatibility, maximized network availability and more. Be prepared with flexible and scalable datacom solutions from Legrand.

Cable Management for Data Communications

Mighty Mo® racks and cabinets help support cable densities typical in a data center. They also ensure minimum distortion and maximum network performance.

Cable Pathways

Wire mesh cable trays deliver on performance, safety and economy both overhead and infloor. They provide maximum strength for minimum weight, as well as flexibility and easy installation.

Fiber Optic High-Density Solutions

Legrand high-density solutions are specifically designed for space-constrained installations. High-density rack-mount fiber enclosures with either adapter panels or pre-terminated cassettes provide a complete fiber cross connect patching solution.

STATE-OF-THE-ART CLASSROOMS

THAT CREATE WORLD-CLASS DOCTORS

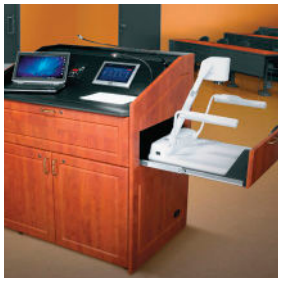

Teaching hospitals require state-of-the-art classrooms, lecture halls and meeting rooms with video conferencing capabilities. Legrand products support flexible power management while achieving a variety of A/V needs.

Smart Teaching Technology

Legrand A/V solutions feature credenzas that house key equipment for telemedicine, video conferencing, interactive teaching and multimedia presentations.

Pathways That Communicate

Middle Atlantic's lecterns feature the unique Frame to Furniture™ foundation. The core is a quality rack frame, covered with one of many standard finishing kits or a customized skin.

Intelligent Connections

Evolution Series Floor Boxes have been developed specifically with A/V and high capacity in mind. Accepting devices from leading manufacturers makes them ideal for conference rooms and lecture halls alike.

STRATEGIES TO IMPROVE YOUR FACILITY

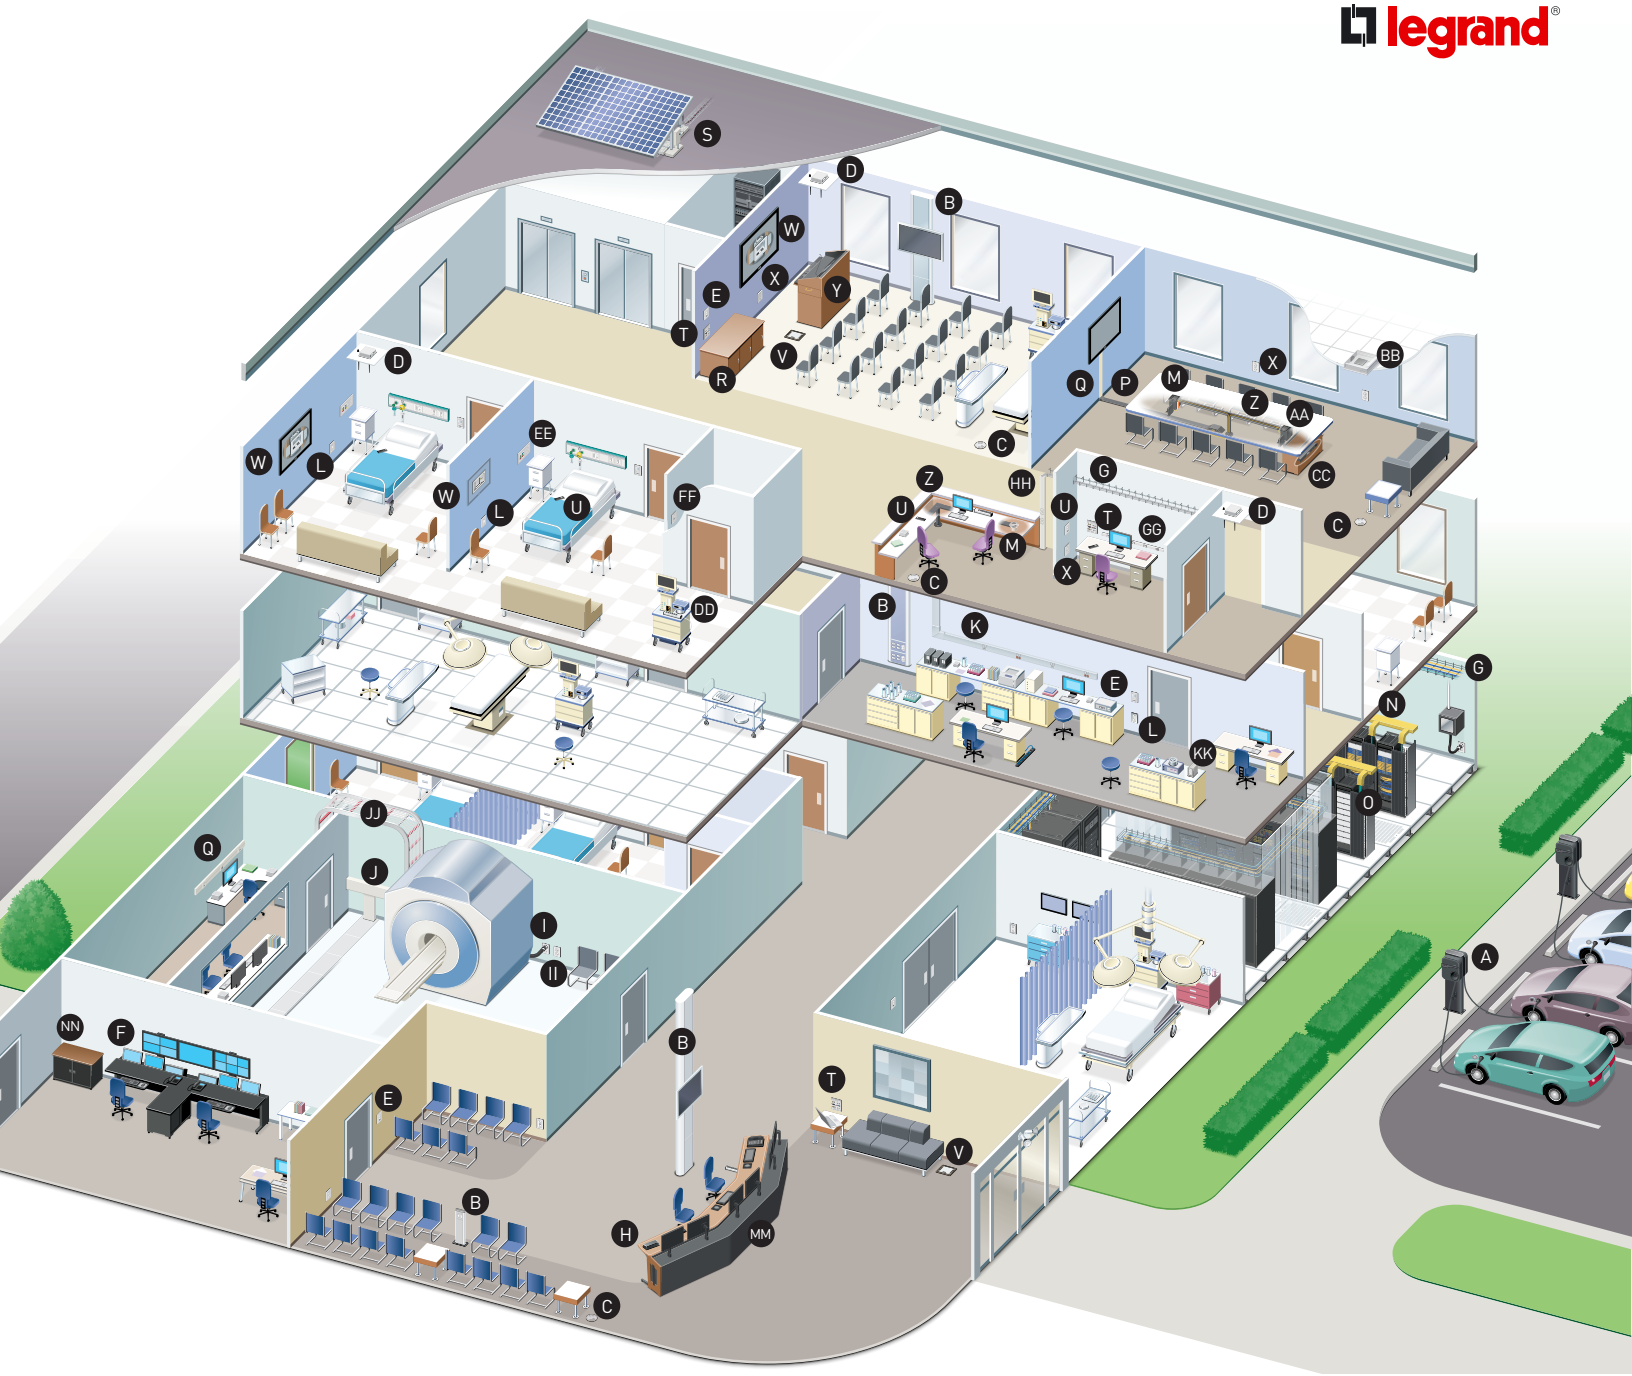

AND YOUR BOTTOM LINE

Improving care today is more than just supporting caregivers and patients. It's about thinking about tomorrow. Your facility needs to be in tiptop shape now and in the future.

Legrand offers a range of innovative, flexible solutions designed so you can take better control of your operating costs. Our products can even make older facilities operate in a more sustainable manner while being easier and more cost-effective to maintain.

The key to success lies in strategies for whole building energy management that reduce energy consumption. Flexible solutions let you manage moves, adds and changes – and adapt new technology – in an easier, less expensive manner.

The result is a stronger, healthier infrastructure capable of delivering better care now and in the future.
