

FLEXIBILITY OF FRP

ØI-RD-PS-EN-0008

Oglaend System has an extensive standard FRP product range, much of which is stocked in strategic global locations. However, we also appreciate that many project require tailor made solutions to overcome unique challenges. In order to deliver standardization with flexibility, our FRP product range and manufacturing systems are designed to offer flexibility. Some examples are shown below:

- FRP profiles (including straight sections of Cable Tray and Cable Ladder) can be supplied in custom lengths.
- Cable Trays and Cable Ladder fittings can be provided in a wide variety of special angles and radius.
- Cable Ladder can be produced in custom widths between 150 and 900 mm.
- Cable Ladders can be produced with a variety of rung spacing.
- Cable Ladder Rungs can easily be added or removed.
- Risers can be easily adjusted so that an inside Riser can be used as an outside Riser and vice versa.
- Straight Cable Ladder sections can be supplied in kit form to save on shipping volume.
- The majority of accessories can be supplied in SS or FRP material.
- Fasteners can be supplied in SS or Composite material.
- We have standardized our products so that even after delivery it is possible for fastener and accessory material type to be changed without the need for any additional modifications. (This is applicable to the majority of our products).
- FRP products are easy to cut and drill on site and by using our Smart Jigs you can ensure that perforations for splice connectors are drilled in the correct location.
