

Oil & Gas

lindapter[®]

Technical Innovation in
Steelwork Connections

Welcome

Safely securing steelwork for over 75 years

Lindapter products are used extensively across the globe in onshore and offshore applications, on new build and refurbishment projects including:

10 Reasons to use Lindapter connections

- No on-site drilling or welding
- Reduced installation time and cost (less man hours)
- On-site adjustability (no need for tack welding & grinding)
- No damage to steelwork & coatings
- Hot work permits not required (suitable in hazardous areas)
- Only hand tools needed, power not required
- Sustainable construction (can dismantle for reconstruction or multicycling)
- Technical support includes free connection design
- Independently approved safe working loads
- Product approvals and project experience with major oil & gas companies

Whether securing structural steel sections, heavy duty pipes, electrical instrumentation or flooring, Lindapter has a proven, accredited connection solution.

Established in 1934, Lindapter International is the world's innovator of steelwork clamping systems, eliminating the requirement to drill or weld steel. In comparison to traditional methods, hot work permits are not needed. This allows a safer, faster installation in hazardous environments, whilst significantly reducing costs.

Comprehensive technical support from Lindapter's experienced engineers, ensures an efficient specification process with a free design service and even bespoke product development, passionately referred to as 'Engineered Solutions'.

The Lindapter design and support service includes:

This brochure provides examples of secondary steelwork assemblies, designed for permanent applications. Please ask Lindapter to design the solution to your connection requirement.

Disclaimer Lindapter International supplies components in good faith, on the assumption that customers fully understand the loadings, safety factors and physical parameters of the products involved. Customers or users who are unaware or unsure of any details should refer to Lindapter International before use. Responsibility for loss, damage, or other consequences of misuse cannot be accepted. Lindapter makes every effort to ensure that technical specifications and other product descriptions are correct. 'Specification' shall mean the specification (relating to the use of the materials) set out in the quotation given by the Seller to the Buyer. Responsibility for errors or omissions cannot be accepted. All dimensions stated are subject to production tolerances – if in doubt please check with Lindapter. In the interests of improving the quality and performance of Lindapter products, we reserve the right to make specification changes without prior notice.

LINDAPTER, HOLLO-BOLT, LINDIBOLT, FLOORFAST, GRATE-FAST etc., are all registered trademarks. Lindapter may also have trademark rights in other terms used herein.

Piping Support

Lindapter support assemblies allow piping to be simply clamped onto structural or secondary steel sections, for a safe, fast installation.

Piping can be installed without drilling or welding and with no interference to plant productivity. The ability to adjust Lindapter assemblies on-site is particularly beneficial as pipes can be easily positioned for speed and convenience.

Maximum Loads

- 250kN for a standard 4 bolt assembly.
(Based on M24 Type AF, grade 10.9 bolts)

Working Temperatures

(dependent on clamp material & bolt grade)

- Minimum -30°C ■ Maximum +350°C

Vibration Resistance

Assemblies featuring the Lindapter Type A, B, or LR fixings are approved by the Lloyd's Register, following tests of tensile, frictional, vibration and shock performance.

Corrosion Protection Options

- Bright zinc plated
- Hot dip galvanised
- Stainless steel
- Plastic coated
- Sheradised

Recommended components for piping applications:

Girder Clamp

Type A

Type B

Type LR

Type AF

Type CF

Type LS

Electrical & Instrumentation

Lindapter provides assemblies for supporting cable trays, cable ladders and electrical equipment from primary or secondary beams.

Cable trays or equipment can be secured in simple tensile arrangements, or in vertical column applications withstanding frictional loads. Fast adjustability allows multiple cable tray / ladder systems to be easily setup to intersect with each other.

Applications include:

- Cable trays and ladders
- Piping and conduit supports
- Instrumentation and associated cabling
- Junction boxes and cabling

Fast, time saving installation

Lindapter connections reduce the installation time on EPC contracts, subsequently increasing site safety as projects require less man-hours.

Recommended components for electrical & instrumentation applications:

Type A

Type B

Type LR

Type AF

Type F3

Type CF

Type LS

Steelwork

Remove the need for hot work permits with Lindapter weld-free steelwork fixing systems. Connecting safety with efficiency since 1934.

The Girder Clamp symbolises the Lindapter philosophy perfectly; boldly challenging the need to drill or weld, when a safe, high strength connection can be quickly accomplished by clamping two steel sections together.

Although the concept is simple, Lindapter products undergo complex design and testing as the experienced Research & Development team constantly refine, improve and invent to achieve greater product performance and gain more international safety approvals.

Standard and bespoke assemblies are specified on oil & gas projects around the world, connecting secondary steelwork, whatever shape and size and in a wide variety of applications. Global project success (see page 22–25) demonstrates that Lindapter steelwork connections are ideally suited to new construction and refurbishment of existing structures.

The following pages show typical applications (please refer to the Lindapter catalogue / website for further examples).

Recommended components for steelwork applications:

Structural Hollow Section

The unique Hollo-Bolt® and Lindibolt® 'blind fixings' are ideal for use on any steel structure where access is only available from one side, eliminating the need for conventional through-bolting or welding.

Installation is carried out quickly and safely by inserting the product into pre-drilled holes then tightening to the recommended torque using only hand tools.

Applications include:

- Primary Steelwork
- Secondary Steelwork
- Blast wall reinforcement
- Staircases and handrails
- Almost any connection to hollow section
- Can also be used on I beams

Hollo-Bolt®: Perfect for new-build projects

The Hollo-Bolt is available in a wide range of diameters, lengths, finishes and head types to suit virtually any type of hollow section, including square, rectangular, circular and oval profiles. The Steel Construction Institute (SCI) and British Constructional Steelwork Association (BCSA) recognise the Hollo-Bolt as a primary structural connection, in the design guide 'Joints in Steel Construction – Simple Connections'.

Lindibolt®: Ideal for refurbishments

The Lindibolt has been designed specifically to be used on refurbishment projects. This unique product will fit into standard pre-drilled steelwork, in typical hole diameters of M10, M12, M16, M20 and M24. The Lindibolt is an incredibly flexible solution as it can be adjusted during installation to fit various thicknesses of steelwork, for example the M24 has a clamping range of 18–72mm.

Recommended components for structural hollow section applications:

Please refer to the Lindapter catalogue or website for full product data.

Holo-Bolt HCF

Holo-Bolt Hex

Lindibolt 2

Floor Fixings

Innovative fixings to connect steel flooring to supporting steelwork without on-site drilling or welding.

Access to the underside of the flooring is not required, eliminating the need for costly scaffolding or elevated floors. Installation can be carried out quickly and safely from above, often by one person. Lindapter floor fixings significantly reduce installation costs in comparison to other methods such as shot firing.

Floorfast®

- For chequer plate floor
- Unique stepped design locks under the flange
- Safely removed for maintenance access
- Lloyd's Register Type Approved
- Hot dip galvanised
- Available in stainless steel

Grate-Fast®

- For open bar grating
- High-strength cast body
- Lloyd's Register Type Approved
- Fits a wide range of beams and grating
- Hot dip galvanised

Type 1055

- Bespoke product for Amec / Shell
- For fitting solid plate to open-grid flooring
- Plates can be positioned at any orientation
- Permanent or temporary fixing
- Stainless steel

Recommended components for floor applications:

Floorfast

Grate-Fast

Type 1055

Case Studies

ExxonMobil Refinery Pipe Supports

Location: USA

Lindapter's adjustable Type LR steelwork clamps were used to install pipe guides along a new pipeline spanning several thousand feet without any interference to plant production.

The new pipeline was installed running adjacent to the existing piping and supported by existing cantilever beams. The design specified that pipe guides should be installed to prevent any flexing from thermal expansion.

Avoiding hot work permits and related fire hazards of traditional welding and drilling methods, Lindapter provided the ideal solution with its Type LR that enabled pipe guides to be installed with simple hand tools and minimal interference. The Type LR is suitable for various beam thicknesses and slopes which enabled the contractor to use a single product across the entire length of the pipeline.

Petroquímica Suape PTA Plant Electrical & Instrumentation

Location: Brazil

Lindapter Type A fixings were specified and installed throughout the new PTA plant of Petroquímica Suape, set to become the most important integrated complex for polyester production in Latin America.

The Type A steelwork fixings were used in a variety of applications across the plant to secure cable tray supports and instrumentation. Specified for its on-site adjustability and its no-weld no-drill installation, the fixings could be installed without any requirement for hot work permits, saving both time and money.

Case Studies

Shell Tern Alpha Project Blast Wall Reinforcement

Location: UK North Sea

A safety upgrade required the original 3mm corrugated steel plate of the north wall on the Shell Tern Alpha platform to be strengthened.

Engineers selected the easy to install Hollo-Bolt to avoid disruption and maintain the integrity of the structure. Access was only required from the internal side and the 'blind' fixings' high load bearing capabilities ensured the horizontal cladding rails remained safely secured.

The reinforcing blast wall was then connected to the cladding rails, strengthening the original wall. Lindapter M16 Hollo-Bolts proved ideal for this application, allowing the new blast wall to be simply bolted to the existing structure.

Centrica Rough Platform 47/8A Helideck Refurbishment

Location: UK North Sea

Lindapter Girder Clamps were used to permanently secure a refurbished helideck to the Centrica Offshore Platform.

Lindapter provided a bespoke connection solution featuring synthetic polymer coatings to eliminate electrical contact between the structural steel and aluminium deck, avoiding galvanic corrosion between the dissimilar metals. Configured with Type A and B clamps, the system featured on-site adjustability for precise alignment of the helideck's interlocking parts and required no welding or drilling for minimal interruption to productivity.

The products supplied were calculated to withstand dynamic loads associated with the landing and take-off of helicopters and their rapid installation had minimal impact on the rig's output, creating significant cost savings.

Approvals

Quality

Accredited to ISO 9001 since 1986, Lindapter strictly enforces a quality management system that includes vigorous product testing to ensure consistently high manufacturing standards.

Q 05143

Environment

Lindapter operates an ISO 14001 certified environmental management system and constantly monitors and improves aspects of the business that may have an impact on the environment, including the use of natural resources, the handling and treatment of waste, and energy consumption.

EMS 546660

Approvals

Lindapter has manufactured to the highest standard for over three quarters of a century, earning a multitude of independent approvals and a reputation synonymous with safety and reliability. Current accreditations include:

CE Marking

For Lindapter products in compliance with the provisions of the EC Construction Product Directive 89/106/EEC, please refer to the website: www.lindapter.com/about/ce

Deutsches Institut für Bautechnik

is a body that approves construction products for use in structural and civil engineering industries in Germany.

Lloyd's Register Type Approved

products have been subjected to tensile, frictional, shear, vibration and shock tests, witnessed and verified by Lloyd's Register.

TÜV NORD is the certifying authority for safety, quality and environmental protection in Germany.

Det Norske Veritas has approved the use of Lindapter products in lifting applications. This includes their use on both mobile and fixed offshore installations.

Factory Mutual, the American insurance organisation, offers an approval which is recognised by the fire protection industry world-wide.

Verband der Schadenversicherer e.V.

is one of Germany's leading independent testing institutions for products used in fire protection applications.

Lindapter is a member of the following organisations:

British Constructional
Steelwork Association

The Steel Construction
Institute

American Institute of
Steel Construction

Technical Support

Experienced engineers offer an unrivalled support service, including free design and bespoke new product development. Lindapter's philosophy is to deliver the highest quality at every stage of the service, from initial connection design to installation guidance.

- Specialist advice from experienced engineers
- Free connection design based upon your requirements
- Bespoke drawings delivered in 2D and interactive 3D formats
- CAD files available to import into all major software applications
- Contractor training and on-site visits (where required)

Engineered Solutions

- Design and development of custom products, manufactured to Lindapter's exacting standards
- Thoroughly tested with detailed reports
