

WIRE BASKET CABLELAY

Wire Basket Cablelay is positioned within lengths of wire basket and tray to protect cables from protrusions, sharp edges, rough and uneven surfaces, pressure points or kinking ridges and to protect the integrity of the data cables.

Damaged cabling considerably slows down system performance, causes loss of data and costs hours of additional work time. Our Cablelay range of products, are designed to minimise the risk of damage often caused during installation, and the subsequent remedial work and protects the cabling for the life of the system.

We have 2 systems available:

- Cablelay Matting
- Cablelay Rigid

Cablelay Matting

Cablelay Matting is lightweight 6mm mat which is clean and flexible, ensuring easy, speedy installation resulting in time and cost savings.

- Protects cables from pressure points and crushing which can damage the performance of a structured cabling system
- Protects cables from sharp edges, snagging, protrusions and ridges to help maintain the performance of the cables
- Cablelay Matting has a Class 0 fire standard which meets British Building Regulations
- Available in a wide range of widths to match your wire basket installation
- Rolls are joined using Cablelay Tape which maintains the Fire Standard and prevents joint movement

Cablelay Matting Meets Building Regulations

Quality assurance and health and safety issues are becoming increasingly more important, Class 0 Cablelay has an excellent fire safety performance complying with British Building Regulations by passing both BS476 parts 6 and 7 for fire propagation and surface spread of flames.

code	description	pack
WBMO660	Cablelay Matting Class 0 60mm	1 x 30m
WBMO6100	Cablelay Matting Class 0 100mm	1 x 30m
WBMO6150	Cablelay Matting Class 0 150mm	1 x 30m
WBMO6200	Cablelay Matting Class 0 200mm	1 x 30m
WBMO6300	Cablelay Matting Class 0 300mm	1 x 30m
